Apprenticeship HUBs in agro-food sector

Apprenticeship HUBs project aims at developing partnerships between VET providers and companies in the agricultural and small food industry sectors. These partnerships will be supported by Apprenticeship Hubs, operating through local development agencies, agricultural cooperatives, chambers, social partners and other similar organizations. The aim of these Hubs is to promote work-based learning of students of agro-food VET schools by working as apprentices in small and medium sized agro-food farms, cooperatives and industries.

PARTNERS

AGRRA (Croatia)

PPVS Ožanić (Croatia)

IDEC (Greece)

INASO-PASEGES (Greece)

Regione Toscana (Italy)

Trebag (Hungary)

HPPC (Hungary)

PROJECT RESULTS

Model of Apprenticeship HUB, to increase the offer of apprenticeship positions in agricultural establishments and small food industries and provide support on organising apprenticeships

Four pilot Apprenticeship HUBs in Croatia, Greece, Italy and Hungary

Apprenticeship HUBs web platform to act as a support tool for the operation of the apprenticeship HUBs

Erasmus+

OUR LATEST NEWS!

February 2021 marks the Apprenticeship HUBs project coming to its end. After two years of working together to develop an apprenticeship scheme for the agro-food sector, the partners are about to conclude the project. We hope that our project will be able to help everyone involved in the agro-food sector.

This project aimed not only at creating a new apprenticeship scheme but also at creating four Apprenticeship Hubs in Croatia, Greece, Italy and Hungary to provide support for VET providers, companies and students. The goal was to offer a gateway for those looking for an apprenticeship in the agro-food sector and those looking for apprentices. These Hubs will promote apprentices among SMEs and collaborate with them in order to support local development.

Activities to come

The AppHubs project coming to an end, the next exciting step will be the dissemination of the project. For this, the partners have decided to organise multiple events that will be the perfect opportunity for all the actors of the agro-food industry (students, VET providers and business owners) to gather around and discuss the future of apprenticeships in this field. The partners will be there not only to moderate the events but to share their experience on building the project, how it can help all the parties involved and how to best benefit from it. Given the current situation with the Covid-19 pandemic, the events will be held online. The partners will publish all the necessary details on their websites and press releases will be published in the local press as a follow-up. Stay tuned to our partners' websites: Hungary (TREBAG, HCCP); Italy (Tuscany Region); Greece (INASO PASEGES, IDEC); Croatia (AGRRA, PPVS Ozanic).

PROJECT OBJECTIVE

Apprenticeship HUBs in the agro-food sector is a project approved under the Call for Proposals for the Erasmus+ Programme for 2018, within the Key Activity 2 in the field of Vocational Education and Training.

Project objective is to contribute to better employment chances of students and graduates and better qualifications matching the needs of the small farms through the engagement of agricultural small and medium enterprises (SMEs) in apprenticeship schemes
